

Rotatool™ Launches U.S. Operations, Bringing Innovative Products to U.S. Podiatrists

Rotatool™, a leader in podiatry equipment and products, has announced the launch of its U.S. operations in South Dakota. For over a decade, Rotatool has provided high-quality podiatry solutions to American healthcare professionals via its Canadian operations (Pedicare). The launch of Rotatool in the U.S. underscores their dedication to serving the U.S. market.

Rotatool specializes in delivering a full range of innovative products designed to support routine foot

care. Its portfolio includes high-performance rotary units, precision-engineered burs, durable abrasive caps, and reusable instruments, all designed to meet the rigorous demands of podiatric practices. Additionally, Rotatool proudly offers the popular Susol single use instrument line, ensuring optimal hygiene and patient safety, as well as the Enbio S autoclave, an award-winning sterilization solution for exceptional efficiency and reliability.

“We are thrilled to officially establish our presence in the U.S.” said Jennifer Winter, President of Rotatool. “This expansion allows us to bring our innovative and high-quality products closer to podiatrists nationwide, helping them deliver superior patient care.”

By combining precision, quality, and innovation, Rotatool is committed to empowering podiatric professionals with tools that enhance efficiency and improve patient outcomes.

Alaplex® — A Comprehensive Approach to Nerve Health

Alaplex® from The Tetra Corporation has been reformulated to include L-methylfolate calcium, the biologically active form of folate (vitamin B9). This newly added ingredient enhances the product's efficacy in managing diabetic peripheral neuropathy (DPN) symptoms, as recent clinical and pre-clinical studies suggest that L-methylfolate can address the underlying causes of DPN while providing long-lasting symptomatic relief.¹

A Synergistic Formula for Nerve Support

Alaplex® represents a novel, comprehensive solution for nourishing the nerves of the peripheral nervous system. It is formulated with a synergistic combination of key nutrients, including:

- Benfotiamine
- Alpha-Lipoic Acid (ALA)
- Vitamins B2, B6, B12, B5, B3, and B9
- Biotin, Choline Bitartrate, Inositol, and Parsley Leaf Powder

This balanced blend of neurotropic B vitamins, antioxidants, and essential nutrients is designed to support nerve function, reduce symptoms of DPN, and promote overall nerve health.

Clinically Proven, Affordable, and Convenient

Alaplex® offers an affordable treatment option at approximately \$1 per day, making it accessible for patients seeking effective nerve health support. The product comes in easy-to-swallow veggie capsules, which can also be opened and sprinkled on food for added convenience.

With its clinically proven formulation, Alaplex® is particularly recommended for patients experiencing symptoms such as numbness, tingling, burning, or shooting pains in the feet and legs. Its combination of essential nutrients, including neurotropic B vitamins and ALA, provides a powerful nutritional approach to managing these debilitating symptoms.

Get Started Today

To receive your FREE sample of Alaplex® and begin offering your patients the latest in nerve health support, contact Tetra's Customer Service Team at (800) 826-0479 or speak with a Regional Sales Manager. [Click here for more information.](#)
