

EFI Drill Has 3 Year Warranty

The folks at **European Footcare** believe that when you depend on

the performance of your drills, you should look for a drill with the best warranty and proven performance.

Their medical drills ship ready to go out of the box and come with a free 2-week money back guarantee trial period. The simple design makes them easy to operate—just step on the footswitch or turn up the speed knob. The bur locking mechanism holds burs more securely than quick chuck designs. The vacuum hose does not clog up, has lifelong warranty and is 5 feet long. Dust bags are easily replaced and not costly. The all-metallic handpiece is slender to afford confident control of the bur, even for smaller hands. You work faster and more accurately. Their Swiss micromotors have the perfect combination of high speed, torque and size for your treatments. Visit www.a-foot.com,

Introducing the KLM Brace

KLM's new brace is a functionally balanced and flexible AFO designed to stabilize the foot/ankle complex and help prevent falls. The custom made AFO shell is lightweight and covered with durable polyester cloth and foam

to create a comfortable soft interface. The Velcro Straps make the KLM Brace easy to put on or take off. All the forms you will need to write a prescription are available on our website—www.kmlmlabs.com—and include an order form, patient use instructions, fall/risk assessment forms and charts, and an easy-to-use fall/risk algorithm for explaining how patients can further reduce risk of falls. The KLM Brace is not intended for treating significant frontal plane deformities, accommodating plantar prominences, Charcot, Drop Foot, PTTD, or osteoarthritis. Treat these conditions with one of KLM's state-of-the-art Richie Braces.

Lasers for Every Podiatry Practice from Aspen

Aspen Laser Systems, LLC announces the release of the widest variety of lasers with price-points for every podiatry practice.

Aspen now offers laser systems fit for every podiatric practice and price-points to add multiple revenue streams while improving patient care. Therapeutic pain relief, unsightly nails, and minor surgical procedures are just the beginning of multiple uses and conditions treated by Aspen's family of lasers.

The exclusive North American distributor of one of the most recognized laser manufacturers in the world, Aspen Laser Systems boast variable wattage, true portability, as well as preset and customized protocols based on treatments and type of use (therapy, surgical, etc).

“Many podiatrists have been reluctant to adopt lasers into their practice, considering lasers one-dimensional,” said an Aspen spokesperson. “These new systems, however, allow doctors a much wider variety of uses and protocols. Return on investment comes more quickly from multiple revenue streams and patients recognizing the difference in care, which improves patient referrals and word-of-mouth to the practice.”

Improved clinical results with reduced treatment times, true portability, a 2 year warranty, and dedicated training are just a few of the advantages that come with the purchase of an Aspen Laser System.

For more information call 877-817-0365 or visit www.AspenLasers.com, or [click here](#).

communication between local podiatric physicians and vascular specialists, focusing on best practices for in-need diabetic patients. Topics of discussion include:

- The growing prevalence of vascular disease
- Advances in office-based vascular technology and their potential clinical/financial benefits

- Advances in endovascular treatment options: an amputation a year ago is NOT necessarily an amputation today

SureFit's Vascular Roundtables are taking place across the country; their next meeting is at the Midwest Podiatry Show. Space is limited to 20 attendees on a first-come basis. To confirm your at-

Flexitol Highlights Clinical Study, Refreshes Packaging

LaCorium Health, the maker of the Flexitol® line of therapeutic skincare products, has recently refreshed the package graphics on its flagship product, Flexitol® Heel Balm for rough, dry, and cracked feet. The winning design was chosen after research showed that the new package was easier for patients to find on store shelves and better communicated the benefits of Flexitol while remaining true to the brand's heritage. In addition, the new package highlights the results of a new clinical study demonstrating that most consumers will experience visible results in just one day when using Flexitol® Heel Balm as directed. The Flexitol® PSP (Patient Sampling Program) is also undergoing the graphics refresh. Each shipment will continue to contain Flexitol Heel Balm sample packets in a counter-top dispenser, prescription-pad sized Flexitol OTC product recommendation sheets, and coupons for patients to use at retail stores. To request a free Flexitol® PSP kit, offices may go online to <http://www.flexitol.com/psp>, email usainfo@flexitol.com, or call toll free at 1-866-478-3338. For more information [click here](#).

Monograph Validates Multi Radiance Super Pulsed Laser Technology

In a recent Scientific Monograph entitled The Pillars Paper¹, **Multi Radiance Super Pulsed Laser technology** was validated in vitro, in vivo, in controlled laboratory studies and in clinical studies. The core of MR4 Super Pulsed laser utilizes the most proven, researched wavelengths. It features a pulsing 640nm red LED, an 875nm broadband infrared LED and a 905nm Gallium Arsenide Super Pulsed Laser. Beyond the core, the Multi Radiance Laser Technology has proprietary features that allow clinicians to achieve the best patient outcomes.

The LaserStim with TARGET and DOSE technology allows clinicians to quickly identify areas of treatment and automatically deliver the correct dose of Super Pulsed Laser. The LaserSweep technology allows for the best tissue absorption as it delays the tissue's adaptation response by varying the frequency.

Multi Radiance Super Pulsed Lasers are reportedly the best-selling lasers in the world. Hundreds of Clinicians a month and thousands of Clinicians a year choose Multi Radiance.² The MR4 offers a combination of highly sophisticated technology, safety and simplicity.

Multi Radiance Laser Technology is also used by Champions.³

practice. These devices easily fit into almost all shoe types. The devices are easily adjusted, posted, modified, and used alone or with a topcover. They have been a value added device both in cost and reimbursement.”

—Gary Most, DPM

Available in five sizes: XS, S, M, L, XL. For more information please visit www.bintzco.com or [click here](#). Call 800-235-8458 to find out about their starter packages.

Medicool Offers Comprehensive Line of Debriding Drills

Medicool is a leading manufacturer of debriding drills to the podiatry community, with solutions for every practice size as well as hospital foot care centers and VA's.

The hazard of breathing airborne particles generated from the debridement of fungus toenails is something that should not be taken lightly. Many podiatrists and assistants have breathing issues as a result of years of debridement procedures. Many have now alleviated their breathing troubles by using a Medicool Debriding Vacuum Drill.

If you, your staff and your patients are being exposed to potential health issues related to airborne debris during debridement procedures, Medicool has a solution.

The Pro Vac File™ Debriding Drill with built in vacuum and The File Stream™ offer powerful motors and a high suction power to collect all those harmful dust particles.

The Pro Power 20K has a cordless, rechargeable design offering convenience, portability, versatility and the freedom of movement between patient rooms or to travel to nursing homes. It has 30,000 rpm's and has the torque equivalent to a 35,000 rpm machine. For those with out-patient visits or multiple patient rooms and a limited budget, it's an excellent solution.

The Pro Power 35K drill is a professional-looking Dremel.

The File Spray Debriding Drill is a water spray system.

Medicool offers a selection of professional carbide burrs with over 20 different styles of long lasting and superior quality tungsten carbide. They also offer a complete range of diamond burrs.

For questions, orders, or product information please call 800-426-3227 or visit www.medicool.net, or [click here](#).
