## **HyperBlue PLUS Laser New from Hyperion**

**Hyperion Medical**, a leading developer and distributor of light-based medical devices, is modernizing the options for pain relief with the introduction of the HyperBlue PLUS with FDA clearance for treatments with Hyperion's proprietary delivery devices.

The HyperBlue PLUS is FDA-cleared to emit energy in the visible and infrared spectrum to provide topical heating for the purpose of elevating tissue temperature for the temporary relief of minor muscle and joint pain and stiffness, minor arthritis pain, or muscle spasm; the temporary increase in local blood circulation; and/or the temporary relaxation of muscle. The FDA cleared HyperBlue PLUS uses proprietary 60mm, 30mm and 15mm hand pieces to provide a flat top beam profile to deliver uniform energy to the tissue being treated. The use of the wavelength synthesizer

ensures patients are provided with an even, gentle treatment with minimal patient discomfort.

HyperBlue PLUS incorporates Hyperion's commitment to its customers in providing a laser that is truly multi-use at an affordable price. *Contact Hyperion for more information at 877.275.8760, visit [www.HyperionMed.com](http://www.HyperionMed.com) or click here.*

*Continued on page 144*

developed for the podiatric patient in mind. The Rest Teagan has three adjustable straps across the vamp and is finished with a buckle backstrap for extra adjustability. Available in 2 widths size 5-11 women's.

Vionic: Walk, Move, Live.

*For more information, call Deena Rudden at 415-755-2783, visit [www.VionicShoes.com](http://www.VionicShoes.com) or click here.*

## DPMmailbox.com Offers Free Spam-Free Specialty Email Addresses for Podiatrists

A growing number of podiatrists are choosing email as a favored method of contact for the latest information on medical procedures, pharmaceuticals and devices. Traditional email presents problems for podiatrists and senders alike, including spam, junk mail and time-stealing clutter.

According to Thomas Johnson, president of Medical Mailbox Group (MMG), "We recognized that the average inbox requires regular attention to keep the clutter from piling up. Podiatrists simply don't have the time. The result is missed emails and increased stress."

An @DPM-mailbox.com

address is just like any other email address with several unique differences. It utilizes a customized health-care-specific algorithm to control spam, junk mail and inbox clutter.

All non-MMG domain addresses will receive a "blocked" notification, with one exception...

Any address you send an email to will be automatically added to your "safe" list. You can also import your existing contact lists to your "safe" list.

For example, if your colleague's email address is joe@yahoo.com and you send him an email, he will be added to your "safe" list. Everyone else with an @yahoo.com address will receive a "blocked" notification.

*Learn more at [www.DPMmailbox.com](http://www.DPMmailbox.com) or click here. Call or text inquiries to 516-900-4142.*

## Delcam Custom Insoles, OrthoModel, and OrthoMILL Are Now Part of Autodesk

The ranges of products previously named **Delcam** Custom Orthotic Insoles have been combined under the **Autodesk** Footwear brand. The new group brings together the existing software solutions, OrthoModel and OrthoMILL plus technologies and services for the footwear industry available from Autodesk and Delcam Crispin.

All of the staff from the Delcam businesses have been moved into the new group, meaning that customers continue to benefit from the combined support of the development, sales and technical staff, and their vast experience in the production footwear and orthotic insole industries.

As part of its commitment to the current market and to the Future of Making Things, Autodesk Footwear combines solutions for the design and manufacture of production footwear and custom insoles to enable the creation of a complete custom shoe, from last creation, to complex upper and sole design, to the incorporation of custom insoles.
