

## Miami Sandal New from revere Shoes

The beautiful Miami backs strap sandal from **revere Comfort Shoes** offers superlative style, with exceptional fit and functionality.

The Miami has removable foot beds that have the depth to accommodate custom orthotics. As no two feet are the same, revere's innovative strap ex-

tensions further enhance the fit of the sandals by providing an additional half an inch of adjustability to each hook and look strap. This allows you to personalize the fit to suit the needs of your patient, whilst not taking away from the stylish look of the upper designs.

The revere Miami sandal is available in an array of colors.

## Leg Wrapping Support from MTI

MTI's featured product for March is their Leg Wrapping Support™. The old way of wrapping a leg was to have the nurse hold the leg while the physician wrapped the foot and heel, and then rest the leg against his/her thigh or stomach to wrap the calf and upper leg. If a patient was 300-800 pounds this was a laborious, backbreaking task. Today, physicians and nurses can wrap a patient's foot, heel, calf and leg in a matter of seconds with only one person using the MTI Leg Wrapping Support™. The nurse rests his/her foot on the calf support to wrap the foot and heel, and then flips over the leg wrap for a heel support to wrap the calf and upper leg. This leg wrap is available in a plug-n-play spline option on the foot of all MTI 527 or 450 MTI Exam Chairs, or there is a portable version that can be used with any manufactured chair. Visit <http://www.mti.net/Leg-Wrapping-Supports.aspx> to see the video.

- Calf support width is 8.75"
- Heel Support to wrap the calf and upper leg
- Stirrup position is 7.5" above the leg rest cushion

**SPOTLIGHT ON AMERX**

**AmerX Introduces 3 New Collagen Kit Options**

AmerX Health Care has expanded their advanced wound care product line with the addition of 3 new **Wound Care Kits**. The 5-Day, 15-Day and 30-Day Amerx Kits feature Helix3® Bioactive Collagen Powder packaged with a new 2 X 2 Bordered Gauze Secondary Dressing to accommodate smaller full thickness wounds.

Studies show patient compliance rates increase 60-70% when patients leave their doctors' offices with product in-hand vs traveling to a pharmacy. The pre-assembled kits are designed to provide everything needed for patients to perform proper dressing changes at home and simplify inventory control for your office. Dispensing Amerx kits promotes continuity of care, ensures patients receive the products you prescribe and increases patient compliance, resulting in improved outcomes and greater patient satisfaction.

In addition to the kits, Amerx offers a comprehensive turn-key approach to DME wound care with a full line of PDAC-approved advanced wound care products, compliance tools and necessary supportive documentation to streamline DME billing and wound care protocols. *Contact your Amerx representative to learn how Amerx can enhance your practice growth by calling 1-800-448-9599 or by clicking here.*

**PediFix® Introduces New Plantar Fasciitis Relief Sleeve**

The **PediFix Foot-care Company** has unveiled a uniquely-designed compression sleeve that is now proven to help relieve heel and arch pain related to plantar fasciitis.

“I was skeptical, but it really helps” said one specialist who recently tested the sleeve on his own foot. “Our design is exclusive,” says Milt Moravek, the firm’s sales director. “To relieve strain on the fascia, the PF Relief Sleeve compresses and supports the

## SPOTLIGHT ON NEUROGENX

### Neurogenx 4000Pro Cutting-Edge Medical Device for Neuropathy Treatment

An estimated 20 million people in the United States have some form of peripheral neuropathy. Unfortunately, neuropathy treatment with prescription medications, surgeries, transcutaneous electrical nerve stimulation (TENS) therapy or lasers is not always successful, frustrating both patients and physicians. The **Neurogenx 4000Pro** is a cutting-edge electromedical treatment tool that is FDA-cleared and patented as the only device of its kind.

The Neurogenx 4000Pro generates a sophisticated electronic signal with a wide frequency band to safely treat pain, tingling, burning and numbness associated with peripheral neuropathy. The broad frequency range, combined with an electrical wave form that is similar to that generated by the human body, allows the therapeutic signal to penetrate deeply, affecting change at the cellular level and promoting nerve fiber regrowth. The Neurogenx 4000Pro helps to rapidly restore motor and sensory nerve function while dramatically decreasing pain.

*Find out how to help your neuropathy patients by becoming a preferred provider or an authorized NerveCenter. Call 1-800-335-7624, email [info@neurogenx.com](mailto:info@neurogenx.com), visit [www.neurogenx.com](http://www.neurogenx.com), or click here.*

arch in two directions—around the mid-foot and lengthwise. For many patients, it works instantly.”

“Compression really helps plantar fasciitis more than some people expect,” adds Jon Case, president of the 132-year old family-owned and operated firm. “As a test, we gave out only one Sleeve to bilateral PF sufferers at recent podiatry conferences, and every single one returned, asking for another for the other foot. Our customers are reporting good results when our sleeve is used as part of their treatment protocols. We’re really glad to add this to our assortment of 176 different ways to relieve foot pain.”

*For a new PediFix catalog, free sample of the Plantar Fascia Relief Sleeve, more information, or to order, call 800-424-5561, Fax 800-431-7801, e-mail [sales@pedifix.com](mailto:sales@pedifix.com), contact your favorite PediFix distributor, or click here.*
