

## AIMx Podiatry Launches Liposana®—A Breakthrough in Fat Pad Restoration

**A**IMx Podiatry proudly announces the release of the breakthrough product Liposana®, a human adipose tissue allograft now available to podiatrists seeking advanced solutions for fat pad atrophy, metatarsalgia, post-surgical corrections, and more related conditions. AIMx's innovative technology offers a new approach to restoring damaged adipose structures—one that prioritizes both patient outcomes and practice growth.

Liposana® is derived from real human adipose tissue and remains structurally and biologically intact. Unlike synthetic fillers or traditional scaffolds, Liposana® provides immediate cushioning, pressure redistribution, and long-term tissue repair. Designed for subcutaneous implantation, it behaves like a biological boot—delivering instant offloading and support while promoting native tissue restoration over time.

AIMx Podiatry, in partnership with Britecyte, brings this breakthrough product to the podiatric market as a high-value, cash-pay alternative to conventional treatments. With growing interest in regenerative care and non-reimbursed services, Liposana®

meets the demand for solutions that benefit both patients and providers.

“We choose to offer Liposana® to solve a real clinical problem—and to do so in a way that empowers modern podiatrists,” said a spokesperson for AIMx. “This is about more than just volume restoration; it’s about full tissue repair and long-term functional outcomes.”

*Liposana® is now available for order. To learn more, visit <http://aimxpodiatry.com/liposana>, click here, or contact [partner@aimxpodiatry.com](mailto:partner@aimxpodiatry.com).*

### Gill Podiatry Introduces ModPod Footcare Line

Gill Podiatry Supply is proudly carrying ModPod, a complete foot and skincare line that embodies a fusion of homegrown passion and medical expertise. Now successfully leading the way in innovative treatment, Modern Podiatrist is more than lotions and soaps, each product is meticulously crafted with top-tier natural ingredients to provide excep-

tional foot care.

Modern Podiatrist is an elevated footcare line crafted by board certified podiatrist, Dr. Nicole Freels. Modern Podiatrist offers an expansive line of both pre-

scription strength, and naturally derived products tailored to combat various skin and nail concerns. Whether your patients are facing fungal conditions, pain, dryness, odor, or simply looking to improve their footcare at home—Modern Podiatrist offers holistic solutions for everyone.

The formulas incorporate powerful antifungals such as clotrimazole, and chemical exfoliators like urea, to boost the product line to prescription strength potencies. ModPod products offer real

results efficiently, providing ultimate relief. It is great to use in the office, and to send home with patients for proactive care on their own. *For more information visit [www.gillpodiatry.com](http://www.gillpodiatry.com), click here, or call 1-800-321-1348!*

### Meet POGO®: DARCO's Game-Changing Offloading Sneaker

DARCO International, a global leader in foot and ankle care for 40 years, is excited to announce the release of POGO®. Engineered from the insole out, POGO® is the only athletic shoe featuring Aircore™ Insoles by DARCO—three times thicker than standard insoles for enhanced rebound, cushioning, and all-day comfort. An innovative removable peg system allows you to create a custom offloading zone tailored to your needs, reducing pressure and

*Continued on page 115*

maximizing relief where you need it most. Engineered for extended wear, POGO® is as healthy on the inside as it is stylish on the outside, delivering the perfect blend of performance and support.

Other highlights of POGO® include:

- **Aircore™ Insole:** 13mm of specialized foam for an insole that is 3x thicker, delivering support and springy cushioning for unbeatable comfort that lasts
- **Targeted Relief:** removable pegs for targeted pressure reduction and

custom offloading areas of 1 sq. inch or less

- **Effortless Style:** multiple colorways blending athletic style with everyday versatility
- **Bungee Laces:** for convenience and a secure fit every time
- **Wide Toe Box:** added room engineered for comfort and stability
- **Pull-On Convenience:** heel loop allows for effortless pull-on convenience

Indications for use for POGO® include hot spots, blisters, calluses, small wounds, bunions, corns, neuro-  
ma, metatarsalgia, and more.

DARCO is also celebrating its 40th anniversary, with a continued focus on delivering innovative, high-quality solutions that enhance mobility and improve lives throughout the world.

## New Bone-Preserving Solution for Hallux Limitus

The Accu-Joint® hemi implant from Accufix Surgical® transforms hallux limitus treatment by preserving natural joint structure while replacing only worn cartilage. Unlike traditional implants that resect the end of the joint, this innovative hemi implant is sized 10-15% smaller than the joint surface and therefore transfers the patient's weight from the implant to the surrounding hard bone. With the Accu-Joint®, all of the hard subchondral bone is preserved, which allows for rigid fixation.

Patented instruments remove only cartilage with minimal bone loss of just 1mm, making the Accu-Joint® hemi implant fundamentally different from older designs. Patients can put weight on their toe

from day one, enjoy normal toe flexibility, and keep future treatment options open if needed.

"My patients with the Accu-Joint® are the happiest of all my patients," notes Dr. Stephen Arndt, MD. "They're walking in to follow-up appointments, moving the foot early, with minimal swelling and pain."

Accufix Surgical® offers a complete surgical system with instrumentation designed for precise implant placement. The Accu-Joint® hemi implant is indicated for patients with degenerative and post-traumatic arthritis of the MTP joint.

For additional information, visit [www.accufixsurgical.com](http://www.accufixsurgical.com), click here, or call our customer service line at (888) 123-4567.

### We Reinvented the Hemi

A new standard in the treatment of hallux limitus

- ✓ No resection of the bone end
- ✓ Non-weight bearing design
- ✓ Fast, active recovery
- ✓ Keeps options open

## 20/20 Imaging Launches Symmetry-Sync

Comprehensive and customizable web-based patient studylist.

Zero-footprint DICOM web viewer.

**2**0/20 Imaging, a division of Konica Minolta Healthcare, proudly announces the launch of Symmetry-Sync, an advanced digital imaging solution specifically tailored for podiatry practices. Symmetry-Sync provides an all-in-one platform, seamlessly integrating PACS (Picture Archiving and Communication System), image acquisition, and diagnostic viewing capabilities into a single, user-friendly solution, enhancing diagnostic precision, streamlining workflow, and optimizing patient care.

Symmetry-Sync's comprehensive web-based platform offers intuitive, remote accessibility, enabling practitioners to securely review and manage high-resolution diagnostic images from any location. Its innovative DICOM viewer delivers powerful analytical tools essential for detailed podiatric assessments, including precise measurements and specialized annotation capabilities.

Designed for easy compatibility, Symmetry-Sync works seamlessly with both our new and existing digital radiography (DR) systems, ensuring smooth integration with clinical workflows and minimal disruption to daily operations. Enhanced cybersecurity measures and regulatory compliance safeguards provide robust protection for sensitive patient information.

"With Symmetry-Sync, podiatry clinics gain an advanced, all-in-one imaging platform specifically engineered to address their unique diagnostic and workflow requirements," said Bob Salzman, President of 20/20 Imaging. "to empowering podiatry professionals with solutions that significantly improve clinical efficiency and patient outcomes."

## Bianco Instruments Extreme Collection

The Bianco Instruments Extreme Collection is a series of high-performance nail cutters designed for podiatric professionals: EX-6000 6", EX-5000 5", EX-166 5", EX-165 4.5", EX-172 5" Curved, and EX-007 6" Straight & Curved.

Crafted from high-quality stainless steel, these cutters offer long-lasting sharpness and corrosion resistance. Designed for precision, the ergonomic handles provide a comfortable, non-slip grip, reducing hand fatigue during extended use. Ideal for cutting thick,

hardened, or ingrown toenails, these cutters deliver clean, accurate cuts every time.

The cutters come with a variety of tip styles to suit different needs. The Medium Point is ideal for heavy-duty cutting with long-lasting durability. The Fine Point is perfect for precise handling and accessing tough ingrown nails. The Blunt Point is heavy-duty with a right-angle design for added safety. The D Tip is angled 45 degrees for precision with reduced risk of injury. The Cut Back Tip excels in tight spaces with strong resistance to bending.

Bianco Instruments Extreme Nail Cutters are trusted by professional podiatrists for their reliability, precision, and safety. In addition, there's free sharpening on all Bianco brand instruments—just pay \$6 for return shipping.

## Apis Launches Innovative Orthopedic Shoe for Enhanced Comfort and Support

Apis Footwear, a trusted name in orthopedic and therapeutic footwear, proudly announces the release of Model 9820 in its FITec Collection—a new design engineered to deliver superior comfort for individuals with foot deformities and sensitive conditions.

Now fully in stock and available for immediate delivery, the 9820 is offered in a wide range of sizes (7, 7.5–11.5, 12–17) and widths (D, 4E, 6E, 9E) to meet diverse patient needs.

This model features a stretchable Lycra upper that adapts to various foot shapes, providing a truly pressure-free and customized fit. Its

B/L Slits design accommodates bunions and bunionettes with ease, delivering targeted comfort without sacrificing structure.

The thick foam outsole enhances shock absorption and stability, making it ideal for daily wear, post-surgical recovery, or long-term orthopedic support. Lightweight and thoughtfully engineered, the 9820 is an excellent choice for podiatrists, orthopedic clinics, and individuals seeking high-performance adaptive footwear.

## Introducing the Next Generation of Midmark Steam Sterilizers

When you Invest in Midmark sterilizers, you can be confident you are getting the best—Midmark sterilizers are the market-leaders year after year. The next generation of Midmark Steam Sterilizers are designed with intuitive instructions that can simplify compliance, cycle operation, and performing and recording device care. This can help to reduce transcription and documentation errors which could account for 56% of sterilization errors. To access scan the QR code at right. Automated mechanical monitoring and chemical indicator reporting can save time, helping simplify staff training and giving them confidence to process instruments.

The new sterilizers are designed to help make instrument processing as easy and as automated as possible. Navigate cycle setup and other processes with a clear, fingerprint-resistant 5-inch touchscreen you can utilize while wearing gloves. Choose a style—light or dark mode. Stay audit-ready with device reminders and notifications, user authentication, unlimited storage of

routine care events for the life of the sterilizer, and automated cycle recordkeeping. Midmark sterilizers have been designed for durability, including an increased device life of 25,000 cycles thanks to a completely reengineered chamber. This can reduce the frequency of required maintenance by users and certified technicians by more than half.

## Cutting Edge Announces Latest Laser Innovation

Cutting Edge Laser Technologies has officially launched the M-Hi MLS® Therapy Laser, marking the next milestone of photobiomodulation therapies for foot and ankle surgeons.

Since 2001, Cutting Edge has been dedicated to improving the healthcare landscape with best-in-class laser technologies. The new M-Hi model builds on the patented and clinically validated MLS Therapy Laser platform, delivering high-powered treatments that are both fast and safe—ensuring effective outcomes without sacrificing patient comfort.

Engineered with powerful protocols for both point-to-point and scanning techniques, the M-Hi Laser delivers therapeutic energy directly to the target tissue while remaining below the threshold for thermal damage. Its state-of-the-art design and upgraded performance make it an ideal solution for managing pain and inflammation across a wide range of podiatric conditions.

Become one of the first foot and ankle specialists in the United States to offer the latest innovation in MLS Laser Therapy technology. To learn more about the M-Hi MLS Therapy Laser, visit [celasers.com/learn-more](http://celasers.com/learn-more), click here, or call 800.884.4184 x400.
