

Stable Step, LLC Acquires Archmolds, LLC

Stable Step, LLC (Powerstep®) has announced their recent acquisition of Archmolds, LLC, a privately held company. The acquisition of Archmolds, LLC will improve Stable Step's orthotics offering to existing customers. "We are excited to once again expand our offering of high-quality orthotics with the addition of Archmolds™ heat moldable insoles. They perfectly complement Powerstep® products," said Rhonda

Newman, president of Stable Step, LLC. "Additionally, Archmolds™ customers will gain access to a wider va-

riety of Powerstep® orthotics and supports. We expect a seamless integration for all customers and they'll continue to get the highest quality products and excellent customer service they've always experienced with Stable Step."

Archmolds™ offers a full line of heat moldable insoles including the Ultimate, Maximum, Standard, Lean and Multisport models for optimal performance, health and comfort. They feature polyurethane cushioning over a full-length, heat-moldable sub-layer that includes a deep heel cup and adequate arch support for motion control. Archmolds™ provide a custom-like, personalized fit and mold to the shape of the foot without compromising support. Archmolds™ insoles help support and align the body properly during daily activities or while walking, running, skiing and hiking. They also aid in the relief and the prevention of many common problems including heel and arch pain due to plantar fasciitis, heel spurs, runner's knee, overpronation and knee and back pain.

Archmolds™ was founded in 2005 and was headquartered in San Diego, CA.

Nike Oregon Project Head Coach Alberto Salazar Utilizes Multi Radiance Medical Lasers on Elite Runners, Facilitating Performance and Recovery

Multi Radiance Medical (MRM), manufacturer and marketer of FDA-cleared lasers for drug-free pain relief, announces that Alberto Salazar, previously one of the top distance runners in the world and currently the head coach of the Nike Oregon Project, utilizes Multi Radiance lasers to help athletes prepare, perform and recover from injuries until the pain is completely resolved. MR4 LaserStim™/LaserShower™ and the MR4 ACTIV™ cordless laser provide a quick and effective drug-free alternative to prescription medication.

Alberto Salazar

"MR4 lasers are now my go-to modalities for addressing lower extremity injuries that are slow to heal," says Salazar, who set the World Record for the New York City Marathon in 1981, and is currently renowned for helping to reshape the status of American distance running. "The devices are typically used on all athletes in the facility, but I always send the portable MR4 ACTIV with any athlete who is traveling or heading to an event. We have seen great results."

MR4 laser technology's proven, proprietary, synergistic wavelength laser/light/magnetic field combinations maximize laser treatment capabilities, accelerating the recovery process and temporarily relieving pain associated with injuries and chronic conditions.

"We're pleased to contribute to the success of coaches and athletes involved in the Nike Oregon Project, a group that was created to promote American long distance running through elite coaching and revolutionary training methods," says Max Kanarsky, president and CEO of MRM. "The Project is one of the most prestigious training groups in the world, committed to developing the best distance runners in the world through rigorous training and the utilization of cutting-edge sports science and performance technology. MRM lasers are clearly in this elite category."

Dermpath Provides Epidermal Nerve Fiber Density Testing

Epidermal Nerve Fiber Density testing provides a qualitative and quantitative view of your patient's epidermal nerve fiber density. Making an early diagnosis of small fiber neuropathy allows you to establish a treatment plan early on and monitor progress with a follow-up biopsy. The Institute for Podiatric Pathology services clinicians nationwide and is a full-service podiatric pathology laboratory. Their diagnostic reports provide a thorough interpretation of the patient's disease state. In addition, their der-

matopathologists are available for consultation via phone or email.

Carlos Nousari, MD leads the Institute's ENFD testing at their location in Pompano Beach, FL. Dr. Nousari, a leading authority on immunodermatology and an active dermatologist and dermatopathologist, is former director of immunodermatology at Johns Hopkins

University, where the neurophysiologic values of the ENFD were originally developed. Dr. Nousari is also available to discuss the diagnosis and management of reported cases at any time and can be reached by email at cnousari@dermpathdiagnostics.com or by phone at 866.836.1925.

Michael Miller, MD leads the Institute's ENFD testing at their location in Port Chester, NY and is available to assist you with pre-biopsy planning or interpretation of the test results. Dr. Miller can be reached by email at

mmillier@dermpathdiagnostics.com or by phone at 866-312-8996.

If you would like to request a kit or learn more about the Institute or ENFD testing, call 866-369-6071, email IPP@DermpathDiagnostics.com, visit www.PodiatricPathology.com, or [click here](#).

SPOTLIGHT ON POLYGEL/GELSMART

GelSmart® SmartGel® Technology Complimentary Sampler Kit

GelSmart recently released its latest product catalog featuring several new product additions featuring SmartGel technology.

The new SmartGel Technology enhances the efficacy of many of the GelSmart products that you've come to rely on, with advanced gel materials developed for your patient's skin type. The natural additives in each of the four SmartGel

formulas have properties designed to address the issues of a particular patient profile, and the accelerated additives are intended to maximize your opportunity to suc-

cessfully treat your patient based on his/her specific conditions and needs—from protecting a diabetic patient to helping improve post-op or long-term scarring. Natural hydration is also key to SmartGel Hydration Therapy. The infusion of Ceramides (fatty acids that help skin retain moisture), including vitamins F and E, provides essential, natural fatty acids for deep hydration.

Orthotic Holdings, Inc (OHI) Acquires Australian Orthotic Group

Orthotic Holdings, Inc. (OHI), a leading manufac-
Continued on page 166

turer in North America of custom, lower extremity orthotic devices and related products, has announced the acquisition of Australian Orthotic Group (AOG), an orthotic distributorship serving the Australian and New Zealand markets. AOG is headquartered in Sydney, Australia.

AOG founder Paul Linton has joined the OHI senior management team as Vice President, International Sales.

Mr. Linton, former North America Sales Manager for OHI's The Orthotic Group brand, founded AOG in 2003. For more than a decade, AOG has been the exclusive distributor of TOG's industry-leading GaitScan diagnostic and digital casting scanner as well as TOG's complete suite of products.

Said Mr. Linton, "By leveraging OHI's extensive cross-brand product offerings, AOG is better positioned than ever to service our existing client base while exploring new opportunities that would have been impossible

without OHI. We have the freedom and leverage now to establish ourselves as the leader in custom lower extremity products across all of Australasia."

Added OHI President and COO Jason Kraus, "As OHI continues to expand its global reach, AOG represents a powerful springboard into a market of rising significance and growth potential. Paul Linton has done an incredible job of laying the groundwork for expansion and I'm thrilled to have him leading our international sales efforts."

Pedigenix® Foot Care Systems: An Intelligent Approach to Foot Care

The Pedigenix® Foot Care System is a comprehensive line of foot care products that target and correct specific foot concerns while complementing your in-clinic care. Formulated to work synergistically, these four products—Daily Foot Cleanser, Daily Foot Moisturizer, Exfoliating Crème and Deodorizing Liquid Powder—cleanse, exfoliate, soften and deodorize feet, establishing and reinforcing a proactive and customized daily regimen for preventive foot care. Pedigenix products are diabetic-friendly and deliver solutions to effectively address hyperkeratotic tissue, calluses and bromhidrosis. Patients will find the formulas both efficacious and pleasant to

use, further ensuring regular daily use. The products can be used individually or in combination to create an easy-to-follow home treatment plan.

Pedigenix products can be conveniently dispensed right from your office to enhance compliance. The Pedigenix System Starter Kit is available in a patient-friendly counter-top display to offer you a quick start in sampling and dispensing the regimen. To learn more or to request free samples customized with your name, call Performance Health 1-800-246-3733, visit www.pedigenix.com, or [click here](#).
