

# MediTouch® EHR Nursing Home Patient Management: Long-Term Care the Shorter Way

By Dr. Seth Flam, President & CEO, HealthFusion, Inc.

If your podiatry group services nursing homes and other types of long term care facilities, you may find your current EHR is not designed for your unique workflows. Long term care should not mean longer workdays; with MediTouch, you will shorten the time you spend charting and managing nursing home patients with the same EHR you use in your office.

Streamline your nursing home visits with:

- Mobile Charting*
- Dual Mode Scheduling*
- Streamlined Patient Registration*
- Multi-Patient Fax and Print*
- Location Management*
- Data Upload*

128

## Here's How It Works: Mobile Charting

If a non-provider user is working on encounters they can switch providers on the fly. The calendar resource is the provider who was responsible for creating the encounter note.

Sometimes nursing home staff present a new patient at the time the provider is visiting the facility. An "easy registration" interface for providers on-the-go is offered.

When working at the facility the provider simply finds the patient they are caring for on the patient roster list and clicks on the SOAP button to document the encounter. Encounters with a date are completed

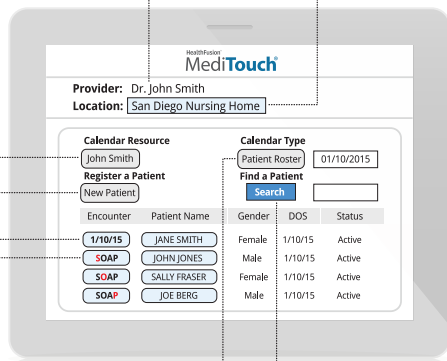

Open encounters that have partial notes display the last SOAP element accessed by the provider. Every encounter is tracked and if there is no date, the encounter has not been completed.

After logging in, the user is displayed. A user can be a provider or their staff.

The user can toggle between a time-based (standard) calendar and a patient roster. The roster is displayed and it is comprised of all the patients associated with the location.

The user can choose what location or facility they are visiting or managing.

Convenient search function will find any patient based on name and date of birth.

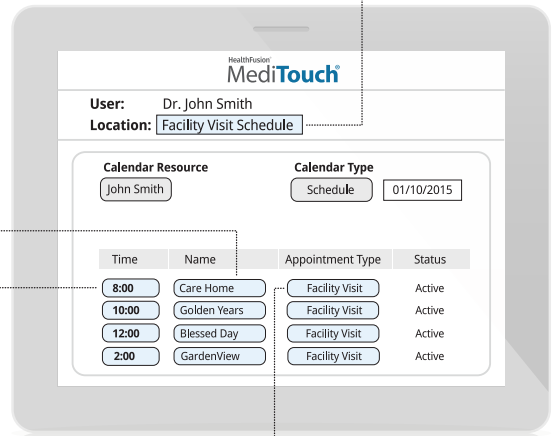

## Here's How It Works: Dual Mode Scheduling

Manage your facility visit schedule to review what nursing homes you are scheduled to visit

The name of the home is displayed

This is a time-based schedule that acts as your personal day planner

Note the appointment type is "facility visit"

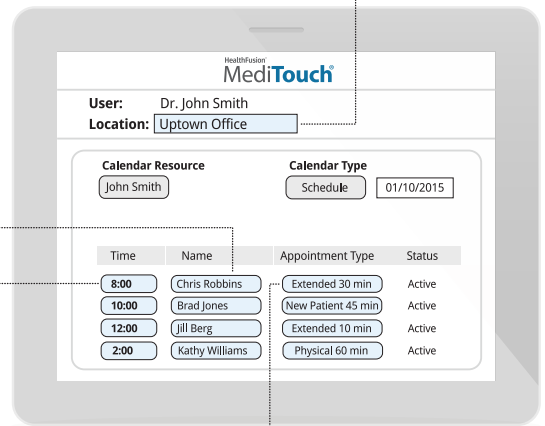

Manage your office visit schedule

The name of the patient is displayed

This is a time-based schedule that manages your office schedule

Note the appointment types conform to the standard office types

## MediTouch® (continued)

### Here's How It Works: Streamlined Patient Registration

HealthFusion  
**MediTouch**

Provider: Dr. John Smith  
Location: San Diego Nursing Home

Calendar Resource: John Smith  
Register a Patient: New Patient

Calendar Type: Patient Roster 01/10/2015  
Find a Patient: Search

Encounter	Patient Name	Gender	DOS	Status
1/10/15	JANE SMITH	Female	1/10/15	Active
SOAP	JOHN JONES	Male	1/10/15	Active
SOAP	SALLY FRASER	Female	1/10/15	Active
SOAP	JOE BERG	Male	1/10/15	Active

First Name: [ ] Address 1: [ ]  
Last Name: [ ] Address 2: [ optional ]  
Date of Birth: MM/DD/YYYY City: [ ]  
Sex: - Select one - State: - Select one -  
Race: Patient Declined Zip: 5 digital code [ ]  
Ethnicity: Patient Declined Home Phone: [ ] [ ] [ ]

### Here's How It Works: Multi-Patient Fax and Print

HealthFusion  
**MediTouch**

User: Dr. John Smith  
Location: San Diego Nursing Home

Print Fax

Select "Print" to print a batch

Select all or just some of the encounters

<input checked="" type="checkbox"/>	Date	Patient Name	Provider	Encounter Status
<input checked="" type="checkbox"/>	1/15/15	JANE SMITH	John Smith	Completed
<input checked="" type="checkbox"/>	1/15/15	JOHN JONES	John Smith	Completed
<input checked="" type="checkbox"/>	1/15/15	SALLY FRASER	John Smith	Completed
<input checked="" type="checkbox"/>	1/15/15	JOE BERG	John Smith	Completed

Check to make sure the encounter is completed (signed)

### Location Management

- Find Any Location with an Easy to Use Search Engine
- Associate Users with a Location

### Data Upload

- Patient Demographics
- Referring Physicians
- Locations (Facilities)
- Clinical Data Conversion

### Shorten Your Nursing Home Workdays with the EHR Designed for Long Term Care AND the Office

Because many podiatrists toggle between the office and the nursing home, we've highlighted our new nursing home feature here. But MediTouch is also used by many podiatrists for managing and charting their routine office visits. Here's why:

**New DME Claim Splitter** generates separate claims with a click of the mouse

The only web-based EHR that is an **APMA Corporate Partner**

Easy to use connection to **Bako** Integrated Physician Solutions, along with other labs

Medical Economics' Best EHRs of 2014 national provider survey—Top-ranked for Clinical Quality and Support

And much more

Don't struggle with an EHR unsuited for your needs; contact us today to see how MediTouch will streamline your charting at the nursing home and in the office.

Get our free white paper on Nursing Home Management at <http://ehr.healthfusion.com/nursing-home>
