

Top-Ranked EHR Offers Unique New Features to Make Charting and Billing Easier for Podiatrists

HealthFusion's MediTouch® EHR Adds Nursing Home Schedule Management, DME AutoSplit Features, More

By Dr. Seth Flam, President & CEO, HealthFusion, Inc.

As a podiatrist, you may have found that most EHRs are not designed to meet your specific needs. And it's true—most of the top-ranked EHRs, according to the *Medical Economics*' "Best EHRs of 2014" provider survey, are not designed to support podiatrists.

But one EHR that is top-ranked by multiple sources, including *Medical Economics*, is designed for podiatrists. HealthFusion's MediTouch strives to continuously improve its features for foot and ankle specialists, and is the only web-based EHR that is an APMA Corporate Partner.

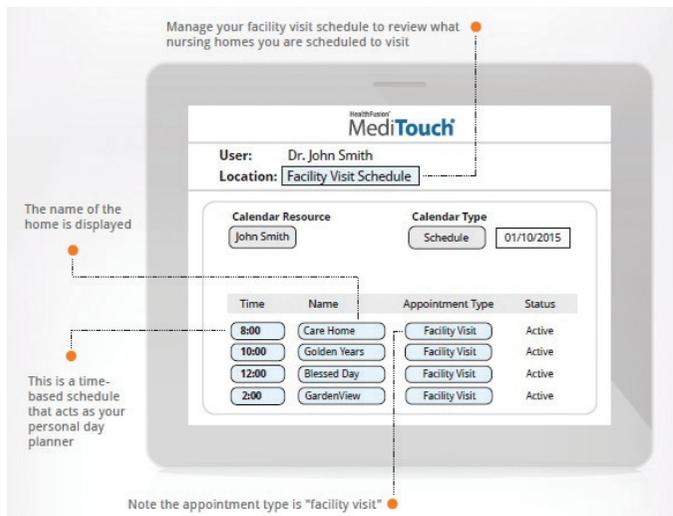

For 2015, HealthFusion has announced new features in its EHR/PM that are specifically designed for podiatrists, all at **no extra cost**:

Plus, HealthFusion offers you proven software that is:

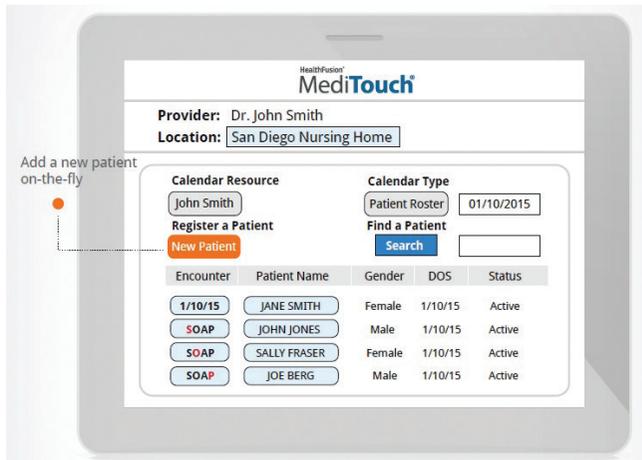

- Pre-loaded with findings specific to the foot and ankle, meaning you can start charting on the first use
- Designed to allow you to quickly upload photos and draw on them right in the patient record

HealthFusion's MediTouch strives to continuously improve its features for foot and ankle specialists.

Top-Ranked EHR *(continued)*

- Top-ranked in **Medical Economics** “Best EHRs of 2014” survey
- The only web-based EHR that is an **APMA Corporate Partner**.
- **Affordable with no start up fees.** Easy to deploy without breaking the bank, and simple to adapt to your workflow.
- **Designed for full functionality on the iPad**, allowing you to chart in the exam room while maintaining patient engagement
- And much more

What Your Podiatrist Colleagues Say

“The system works seamlessly with the iPad, which I use in the treatment room with the patients. The system has significantly improved my patient care documentation and the interchange of information with other physician offices and facilities.”

—Richard DiMario, DPM

“HealthFusion provides features that really make my life easier and speed up the process for me, like up-

loading images directly into the patient’s chart. It’s a much easier upload with a lot less clicking than other EHRs.”

—Peter Brieloff, DPM

“I’m caught up with my charting at the end of the day. It makes a huge difference for my practice and my life.”—Jeff Osbourne, DPM

“I’m caught up with my charting at the end of the day. It makes a huge difference for my practice and my life.”

—Jeff Osbourne, DPM
