

## Introducing the Next Generation of Midmark® Steam Sterilizers

When you invest in Midmark sterilizers, you can be confident you are getting the very highest quality—Midmark sterilizers are the market-leaders year after year. The next generation of Midmark Steam Sterilizers are designed with intuitive instructions that can simplify compliance, cycle operation, and performing and recording device care. This can help to reduce transcription and documentation errors

which could account for 56% of sterilization errors. Automated mechanical monitoring and chemical indicator reporting can save time, helping simplify staff training and giving them confidence to process instruments.

The new sterilizers are designed to help make instrument processing as easy and as automated as possible. Navigate cycle setup and other processes with a clear, fingerprint-resistant 5-inch touchscreen you can utilize while wearing gloves. Choose a style—light or dark mode. Stay au-

## From Awareness to Action: Early Detection and Treatment Planning

athy and other chronic nerve conditions. It is a non-invasive and non-narcotic treatment, clinically proven to deliver superior patient outcomes.

With its unique frequency range of up to 60,000Hz, the device delivers advanced care targeting the root causes of neuropathy and promoting nerve regeneration. The electronic signal penetrates deep and creates change at the cellular level, increasing cellular metabolism,

normalizing pH and encouraging healing.

Providers have consistently reported excellent outcomes in patients, including significant reductions in discomfort and numbness, along with marked improvements in nerve function.

*“The innovative Neurogenx Treatment using an advanced electromedical protocol has shown significant benefits in improving the quality of life in patients with peripheral neuropathy symptoms. The Neurogenx Treatment has also been equally effective for patients with Chronic Regional Pain Syndrome, Restless Leg Syndrome, and Fibromyalgia.”*

dit-ready with device reminders and notifications, user authentication, unlimited storage of routine care events for the life of the sterilizer, and automated cycle recordkeeping. Midmark sterilizers have been designed for durability, including an increased device life of 25,000 cycles thanks to a completely reengineered chamber. This can reduce the frequency of required maintenance by users and certified technicians by more than half.

## **ModMed Once Again Ranks #1 in All of Its Specialty-Specific EHRs**

For the second year, practice technology leader ModMed® sweeps the Black Book® Physician Practice & Ambulatory Solutions list, earning the top ranking for all 11 specialty-specific electronic health record

(EHR) systems in 2025. This historic achievement confirms ModMed's leadership in providing innovative, tailored solutions that empower specialty practices to enhance patient care and operational efficiency.

ModMed's EHR systems have consistently achieved top rankings for multiple consecutive years across all 11 specialties surveyed, which include—in addition to podiatry for the fourth year running—pain management, orthopedics, dermatology, and seven others.

The 2025 Black Book survey evaluated vendors on 18 key performance indicators essential to clinical and operational success. ModMed reportedly excels in these areas, delivering physician-centric design, seamless in-

teroperability, scalability, workflow optimization and practice clinical decision support.

“We're incredibly honored to receive this recognition,” said Dan Cane, cofounder and co-CEO of ModMed. “This clean sweep reflects our unwavering commitment to providing specialty practices with innovative, AI-powered solutions that simplify workflows and empower them to deliver exceptional patient care.”

## **Triova™: New Dietary Supplement from Tetra**

Triova™ is a dietary supplement from The Tetra Corporation designed to improve the health of nails, skin, and hair by addressing issues such as brittleness, dullness, and thinning due to environmental factors, aging, and nutritional deficiencies. It combines clinically supported vitamins, minerals, antioxidants, and natural extracts to enhance cellular health and support collagen production. Triova™ targets dermatologic and trichologic concerns with ingredients backed by robust clinical evidence.

Key ingredients include Vitamin C (for collagen synthesis), Vitamin E (to protect against oxidative stress), Biotin (for healthy hair and nails),

Pantothenic Acid (to promote keratin regeneration), Zinc (for the structural integrity of keratin), and Iron (to improve circulation and nutrient delivery). Triova™ also contains Hydrolyzed Collagen and Keratin for skin elasticity, hydration, and hair repair, along with antioxidants like Grape Seed Extract and Amla Fruit Extract, which protect against oxidative damage and promote skin rejuvenation.

Triova™ helps restore skin elasticity, reduce signs of aging, and strengthen nails and hair. It offers a comprehensive approach to improving skin, hair, and nail health using

scientifically-backed nutrients.

## **Patient-Direct Satisfaction Guarantee**

Tetra products are backed by our groundbreaking patient-direct satisfaction guarantee. This removes risk for your practice, demonstrates our commitment to patient outcomes, and it allows patients to act with confidence.

To receive your *FREE sample of Triova™* and begin offering your patients the latest in nail health support, contact Tetra's Customer Service Team at (800) 826-0479, speak with a Regional Sales Manager, or [click here](#).
