

Vacuum/Drills, Drill Systems, Burs and More from Jan L

Jan L Inc. has been supplying vacuum/drills, drill systems and burs to podiatry for almost 50 years. One of their systems filters debrided dust to .02 micron with 99.999% efficiency (TRUE HEPA); another is amazingly almost silent! They also have modern super smooth running debridement drill systems. Their large burs selection features ceramic burs which stay cooler than other bur materials, providing more patient comfort. Jan L Inc. also sells the full featured Hill Podiatry, Remy Laser, and DR Digital Imager. Visit www.janlinc.com or

click here and order online, or call them for the personal touch at 609.261.1133.

Ypsilon® FLOW ½ & ToeOFF® FLOW 2 ½

FLOW AFOs are Allard's newest generation of AFOs fabricated with a new proprietary formula. This proprietary formula offers increased ROM in the sagittal plane and smoother transition (flow) throughout the gait cycle. The footplate is shaped to allow more clearance for the forefoot in the shoe toe box. Plus, both Ypsi-

lon® FLOW ½ and ToeOFF® FLOW 2 ½ are designed to accommodate lower shoe heel heights, fitting more shoe styles.

Both models are excellent options for patients presenting with posterior tibial tendon dysfunction or foot drop. By not locking up the ankle, Allard AFOs assist with optimizing gait. The slim design allows the AFO to fit in most standard shoes with a heel height difference.

The Remy Class IV Laser Treats Wounds Comfortably for Patients and Efficiently for DPMs with Unattended Therapy

"D iabetic wounds as well as post-surgical wounds are being treated by hundreds of practices in the U.S. by podiatric physicians with The Remy Class IV Laser due to its photochemical effects," reports Dr. David Zuckerman of Remy Laser. "And patients," he adds, "are experiencing faster results as the cellular effects of photobiomodulation increase white blood cell count, as well as oxygen levels and blood flow."

Before and After Remy Laser Treatment for Venous Ulcer

a big difference in not only the recovery process, but also their pain levels."

Peter Bregman, DPM | Bregman Foot-Ankle & Nerve Center | Las Vegas, NV

"We specialize in lower extremity peripheral nerve issues and neuropathic conditions; and we have

found that the Remy has been very useful in that arena. Additionally, we use it frequently in our post-operative management of slight cellulitized wounds or where there's a little bit of redness; and that keeps us from having to put the patient on an antibiotic."

Stephen Barrett, DPM | US Neuropathy Centers | Marietta, GA

Right now you can finance the Remy Class IV Laser for ZERO DOLLARS for the first six months and then just \$99/mo for the next six months. After 12 months, you can lock in a fixed rate that fits your budget.

Physicians can contact Dr. Zuckerman at 856.229.2939 (call or text) and/or email davidzuckermandpm@gmail.com. To see complete specifications of The Remy and to view more DPM testimonials, visit www.RemyLaser.com or [click here](#).

High-powered, Class IV Laser energy (lasers which exceed 500mw) speed healing up by nearly 300 times the normal rate.*

ProviderLINK Boosts Podiatry Practices' Revenue and Cuts Staffing Costs with Virtual Medical Office Support

ProviderLINK is offering remote administrative support for podiatry practices. Their virtual assistant services help with appointment scheduling, benefits verification, RX refills, document filing in Electronic Medical Records (EMR), billing, follow-ups on accounts receivables, payment posting, scribing, patient follow-ups, patient reviews, and any other task that takes time away from patient care. Each practice gets a dedicated

Practice Success Manager for smooth integration and ongoing support.

“Medical professionals are often overwhelmed by the many administrative tasks needed to run a practice,” said Cyril Thomas, CEO of ProviderLINK. “Our virtual assistants are highly trained to manage these responsibilities, allowing healthcare providers to spend more time with their patients and improve practice efficiency and revenue.” Thomas adds that “With ProviderLINK, medical practices can expect increased productivity, over 50% savings in staffing costs, and better patient satisfaction. The company carefully selects only the most qualified and reliable virtual assistants, ensuring high-quality service.”

For more information about ProviderLINK and its virtual assistant solutions for podiatry practices, visit www.Provider-LINK.com, click here, or email cyril@aristagroups.com.

Dermatonics UK and Justin Blair & Company Announce an Exclusive Distribution Agreement for US Sales of Dermatonics Skin Care

Dermatonics UK, a leading skin-care brand in Europe, and Justin Blair & Company, a leader in foot care and shoes, have completed an agreement whereby Justin Blair & Company is Dermatonics' exclusive distribution partner in the US for their products. The depth of products, made with natural ingredients, vegetarian and/or vegan formulation options, diabetic-friendly and coupled with eye-popping consumer friendly packaging, will compliment all footcare-focused facilities.

For additional information, visit the Justin Blair website at www.justinblairco.com, call 800-566-0664, or click here.
