

gSource: Not All Instruments are Created Equal

By Liz Ostrow

Founded in 1999, gSource is committed to putting the finest quality instruments into the hands of podiatrists and their teams.

Not all instruments are created equal. Adequate for the job is, in reality, inadequate. A better instrument reduces distractions and facilitates procedures. A better instrument helps a podiatrist perform at his/her best. A better instru-

ment does not need to be resharpened, refurbished or replaced as often as an instrument of lower quality, or one made from a lower grade steel. A better instrument leads to better results. gSource provides better instruments.

Crafted from German surgical stainless steel, and recognized by their finely finished surface, gSource instruments are designed to perform with precise surgical function. They are also conceived to be affordable. It is this combination that distinguishes the gSource brand.

Most gSource instruments are made from German stainless steel type 1.4021(American steel type 420) which is highly corrosion resistant and has excellent longevity when properly maintained. Every gSource instrument must pass Quality Assurance tests before it can be sold. Instruments are tested for critical dimensions, function, pattern consistency, material and workmanship.

gSource instruments and springs are guaranteed for life against manufacturing defects of material and workmanship. Any instrument proving to be defective will be replaced or the purchase price refunded.

The gStore offers convenient and secure online shopping of over 4,300 instruments in the gSource catalog,

with many patterns for podiatric procedures. Visit www.gSource.com to register for an account. The instruments are available for same day shipment from gSource headquarters in Emerson, NJ. With an extensive product offering, gSource provides podiatrists with a single source for instruments and is also proactive in providing solutions for their instrument needs.

gSource offers expert sharpening, spring and screw replacement and refurbishing repair services to ensure quality performance during the entire life of your gSource instruments, and other instrument brands, according to gSource Verified Quality standards. Refurbishing your instruments will help bring them back to “like-new” condition. This
