

Powerstep® Offers Highest-Quality Affordable Prefabricated Orthotics, Fusion Recovery Sandals and Slides

By M. Moreland

Powerstep® is a leading brand in the prefabricated orthotic market. Trusted for over 25 years, Powerstep manufactures the highest quality orthotics at its facility in Wadsworth, OH. The key to the company's success has been a combination of effective, affordable podiatrist-designed products for preventing and relieving the most common foot problems and outstanding customer service.

Over 4,000 medical professionals prescribe Powerstep ProTech orthotics. The ProTech line is available only to medical professionals, and in-office dispensing allows doctors to offer patients immediate and affordable pain relief as a first-line therapy for mild conditions while considering or waiting for custom orthotics.

Similar to everyday shoes, Fusion Recovery Sandals and Slides have support built right in to help keep people on their feet all day. Built-in arch support helps keep the foot properly aligned to reduce

the discomfort and pain from plantar fasciitis, and the deeper heel cup provides that added stability needed in shoes.

Powerstep's therapeutic footwear helps relieve foot

Powerstep's therapeutic footwear helps relieve foot pain and can actually correct foot conditions.

123

Powerstep's ProTech line features arches calibrated with flexibility, dual-axis foot control, and stabilizing heel cradles with PORON® Cushioning to provide first-line therapy for plantar fasciitis, heel spurs and other conditions.

The Powerstep ProTech line features a full assortment of medical-grade polypropylene supports to meet all prefabricated orthotic needs. These orthotics feature arches calibrated with flexibility, dual-axis foot control, and stabilizing heel cradles with PORON® Cushioning to provide first-line therapy for plantar fasciitis, heel spurs and other conditions—relieving heel and arch pain, as well as knee and lower back pain.

Trusted by consumers for nearly 30 years, Powerstep® continues to expand the product line to offer comfort, support and style with Fusion Recovery Sandals, Slides and Slippers.

pain and can actually correct foot conditions. While regular sandals and flip flops can actually lead to foot problems and enhance current foot pain, Powerstep's sandals and slides realign the feet and preserve the arches, correcting current foot conditions.

New for Summer 2019, Powerstep® is offering a new slide style for men and women and two new color options to the popular line of Women's Fusion Recovery Sandals. The Fusion Slide has an easy, slip-on style with a single strap for a secure fit. The black color with minimal white stitching accent makes it versatile enough to wear from poolside to casual dress.

The two new color options for Fusion Sandals, Khaki and Plum, are available in women's sizes. The Plum color follows trends in footwear and is complemented with Light Gray accents and a Charcoal Gray base. The new Khaki color offers a neutral color with tan and coral accents. The new additions expand the women's line to five color combinations, which also includes Teal/Gray, Brown/Coral and Black/Light Gray.
