

## Changing the Game—Remy Class IV Laser

DPMs Share Their Experiences with The Remy Class IV Laser

Over 500 Remy Class IV Lasers have been placed in podiatric practices in the U.S. in the course of four years. This is because The Remy is an ideal combination of power, portability, function and affordability. If there's one phrase that's been used over and over as DPMs share their experience, it's "game changer."

questions too small and he's always available to answer.

### Partnering with Dr. Zuckerman

Superior technology and affordability matter—but so does the provider you partner with. In addition to providing ideal technology, the support David Zuckerman, DPM of Zuckerman Future Technologies provides is unmatched.

### Brad Schaeffer, DPM | New York, NY

"The Remy Laser has been a **game changer** in our practice. I'll just be honest. We already have two, recently purchased a third. Patients come in asking for this. They're expecting modern updates to all practices. It's been great for injuries and tendonitis. We also use it for neuro-mas and of course toenail fungus. It's just been great for the practice and you should check it out."

### Fausto Ramos, DPM | Perth Amboy, NJ

"It's been about a year that I've been using the Remy Laser in my office, and it's been a **game changer** for our practice. It's allowed me to treat different pathologies in a conservative way. You can treat pain, diabetic neuropathy; you can treat plantar fasciitis; you can treat postoperative patients to reduce their scarring and swelling. Also, instead of sending the patients to physical therapy, they can come to your office for laser therapy. I also like that I can treat patients for nail fungus. It's been a **game changer** and it pays for itself."

### Suzette Clements, DPM | Decatur, GA

"As a surgeon, I'm always looking for natural ways to help my patients heal and to enhance healing. The Remy has been an exceptional addition to the practice. I've used it successfully on plantar fasciitis, Achilles tendonitis, ankle sprains; pretty much any inflammatory conditions. Immediately after treatment, patients walk out and they will verbalize either no pain at all, or significant decrease in the pain.

It also is FDA-cleared for toenail fungus. So it has multiple healing modalities and it has been a **game changer** in my practice."

### Nikki Alexander, DPM | Philadelphia, PA

"I have had the Remy Laser for six months now. Two words—**game changer**. It's affordable and multi-functional; I've seen a significant increase in my cash revenue. The added bonus is that it comes with the coaching of Dr. Zuckerman, who is always available. There are never any

### Mark Poplawski, DPM | Toms River, NJ

"As far as ROI, there's nothing better out there. Not only get a quality laser, but the support that I've gotten from Dr. Zuckerman is second to none. I can't tell you how much it meant to me that Dr. Zuckerman has been by my side the whole time, getting adjusted and acclimated to the laser, but also supporting the practice with marketing materials."

### David Petersen, DPM | Laguna Woods, CA

"I do want to share a story about how Dr. Zuckerman helped us. There's a ceramic handpiece we use when we treat fungal nail; well, the cord was left, hanging out and one of my patients caught it with her walker, flinging the hand piece to the ground and cracking it. My heart sank because we had just purchased it, made the investment, and now it was broken. I called Dr. Zuckerman and within three days, he sent out a new hand piece at no cost to help us continue to treat our patients. He personally trained me and my partner and has always been accessible. When I've had questions about supporting documentation and researching patient experiences, he responded in less than 24 hours. He even responded to me while he was on vacation in Europe."
