

Pedicis Research Welcomes a New Addition to Its Family of Products

By Larry Stoll, Pedicis Research

Our business philosophy has always been to create unique brands that utilize distinct ingredients to create extraordinary results. With that in mind, we saw the emergence of CBD derived from Hemp as an opportunity to formulate a truly unique product for pain. That product is Hempcin™, our highly effective pain relief cream. We combined 700 mg full-strength Hemp extract (including CBD) with menthol and all-natural ingredients such as Arnica and Boswella. Each of these natural ingredients enhances the

prevents recurrence. In a clinical study Vircin™ cleared plantar warts in 88% of patients in 2-6 weeks. If you have a resistant wart patient, Vircin™ is the product to try.

Cidacin™ was the first product we launched at Pedicis Research. True to our business philosophy, it is a

unique antifungal solution that uses DMSO and other excipients to deliver tolnafate to the site of infection. DMSO has extensive literature supporting its use as an excellent delivery vehicle for transporting drugs through biological matrices, such as skin and nails. Cidacin™ has been shown to be 85% effective at eradicating fungal species. If you have plenty of difficult fungal patients, Cidacin™ is the product for you.

And lastly, our Plantacin™ formulation combines the powerful analgesic lidocaine with anti-inflammatories in a targeted transdermal delivery vehicle that promotes deep tissue penetration and quick and lasting pain relief. In a

effectiveness of Hempcin™ to either increase pain relief, reduce inflammation, or support joint health.

More specifically, Hempcin™ is made from premium full-spectrum Hemp—including CBD, CBG and other Cannabinoids to provide strong pain relief and anti-inflammatory action for injured areas. All-natural menthol was included for powerful cooling effect and quick pain relief of aching joints. We then

added Arnica montana for its incredible healing powers to reduce pain and bruising. Lastly to support joint health, joint movement, and the immune system, we selected Boswella serrata to complete our formulation. Can your topical pain reliever stack up to Hempcin™?

Hempcin™ now joins our family of products including Vircin™, Cidacin™, and Plantacin™.

Vircin™ is our unique pain-free wart medicine that employs an immunomodulator along with salicylic acid and an anti-viral to provide a one-two-three punch in combating plantar warts. What makes Vircin™ unique is that it is the only product that contains both an anti-viral and an immune-enhancer. The anti-viral kills the HPV virus and the immunomodulator triggers an immune response that

recent clinical study 90% of patients experienced significant pain relief after one application and many of these patients were athletes with recurring foot injuries.

Hempcin™, Vircin™, Cidacin™, and Plantacin™ are sold as over-the-counter products exclusively through podiatrists and dermatologists for dispensing to their patients, or for non-dispensing practices we offer a webstore that is referral-based only and password-protected. These products are not sold in pharmacies or on internet stores.
