

## Experience Next-Level Podiatry Care with SMART-C® Mini C-arm from Turner Imaging Systems

By Rob Scordia

The SMART-C® Mini C-arm from Turner Imaging Systems is a game-changing medical device revolutionizing the way podiatrists practice in their clinics. This wireless, battery-operated mini c-arm weighing only 16 lbs is the ultimate tool for podiatric professionals looking to enhance their clinical efficiency and take patient care to the next level.

One of the unique features of the SMART-C® is its ability to be fully draped for use in surgery, allowing podiatrists to perform procedures in the clinic that were previously reserved

for the OR. This not only reduces the need for redundant equipment but also provides faster and more cost-effective care for patients.

At Turner Imaging Systems, we understand the importance of the doctor-patient relationship. That's why we designed the SMART-C® to allow physicians to meet, image, and treat patients in one room, creating opportunities for clinical efficiency

and enhancing the overall patient experience.

With its versatility, the SMART-C® Mini C-arm can be used for a range of procedures in the clinic, including radiographic and fluoroscopic imaging for diagnostics or minimally invasive surgery. Specifically, when it comes to the foot, weight-bearing fluoroscopy is crucial for obtaining critical information that plain film x-rays cannot provide due to the dynamic nature of the foot's mechani-

cal structure. The device can also perform weight-bearing studies, stress views, and image-guided injections, allowing for the diagnosis and treatment of various foot and ankle pathologies. By relying on a single device for multiple applications, podiatrists can eliminate the need for redundant equipment, ultimately saving time and money.

In summary, the SMART-C® Mini C-arm from Turner Imaging Systems is the ultimate tool for podiatrists looking to enhance their clinical efficiency and take patient care to the next level. With its lightweight design and unique ability to be fully draped for use in surgery, the wireless, battery-operated SMART-C® is changing the game in the podiatry profession.
