

gSource® Finest Quality Instruments

By Anisha Godhwani

Since 1999 gSource has focused on designing and manufacturing high-quality surgical instruments for podiatrists. We are committed to putting the finest instruments into the hands of podiatrists worldwide. Crafted from German surgical stainless steel, our instruments are built to last a lifetime and are recognized by their finely finished surface. gSource instruments are designed to perform with precise surgical function and are also made to be affordable. It is this combination that distinguishes the gSource brand. With over 20 years of experience in the industry, gSource is known for its exceptional quality, precision, and reliability.

With an extensive product offering, gSource provides podiatrists with a single source for instruments and is proactive in providing solutions for their instrument needs. Our catalog contains over 4,800 standard instruments, with many being used for podiatry. Customers can now easily

shop for their needs in our secure online store. The gStore offers free next day shipping on orders over \$250.00 and instruments are readily available for immediate shipment from gSource headquarters in Emerson, NJ. Visit www.gSource.com to register for an account; use code "PMmag" for 20% off your first order!

Our instruments are made with the highest quality materials such as stainless steel, titanium, and tungsten carbide. gSource instruments and springs are guaranteed for life against manufacturing defects of material and workmanship. Every gSource instrument must pass detailed Quality Assurance tests before it can be sold to ensure it will perform its function during critical surgical procedures. Our instruments are inspected for materials, workmanship, function, pattern consistency and critical dimensions. Any instrument proving to be defective will be replaced or the purchase price refunded. gSource is FDA registered and ISO 13485:2016 Certified.

Consisting of a long, narrow, and curved blade with a pointed tip, the gRetractor (40.3150) features a unique design that helps doctors perform with the utmost precision. The ergonomic handle provides a strong and secure grip, easily allowing the surgeon to maneuver the instrument and position as needed. The gRetractor is vital in facilitating a lateral release during bunionectomy procedures, allowing the release of tight tissues on the outer side of the foot to correct a bunion deformity. The gRetractor helps the surgeon with visibility and access, thus minimizing damage to the surrounding tissue.

Our in-house repair technicians offer expert sharpening, spring and screw replacement, cleaning and refurbishing repair services to ensure quality performance during the entire life of your gSource instruments and other instrument

With extensive podiatry offerings, gSource is proud to be your one-stop shop for instrument needs, repairs and solutions.

brands, according to gSource Verified Quality standards. Refurbishing your instruments will help bring them back to pristine condition. This is extremely beneficial as it extends the useful life of your instruments by helping to maintain their optimal function while also reducing your replacement costs. With our repair center, you can be confident that your instruments will function properly during critical surgical procedures and be returned to you in a timely and economical manner. For detailed information and pricing please email repair@gSource.com.

More than a source for quality instrumentation, gSource is an advocate for the podiatric community. gSource can be relied upon to provide superior instrumentation and to do so in a time-critical fashion. gSource is committed to providing innovative solutions that enable podiatrists to deliver the highest level of care to their patients.
