

Physician's Own: Leading Innovation in Wound Care and Natural Pain Management

By Ryan Ashford, Director, Physician's Own and David Corcoran, DPM, Chief Medical Advisor, Physician's Own

Physician's Own stands at the forefront of podiatric care, delivering clinical-strength CBD solutions that blend innovation with proven efficacy. *Specializing in non-narcotic pain management and advanced wound care*, we are dedicated to enhancing patient well-being and supporting medical professionals with our groundbreaking products. Our commitment to excellence and clinical rigor ensures that our offerings not only meet but exceed the needs of modern podiatric practice.

NanoSilver and NanoCBD: Advanced Wound Care Solutions

Central to our wound care innovations is NanoGEL Plus, an advanced gel matrix that integrates NanoSilver and Nano-CBD technologies. This state-of-the-art formulation addresses the complex challenges of wound care, offering exceptional support for patients dealing with diabetic ulcers, chronic wounds, nail procedures, and other skin conditions.

NanoSilver Technology

NanoSilver represents a significant advancement in antimicrobial wound care. Our NanoGEL Plus incorporates nano-scale silver particles, renowned for their potent antimicrobial properties. These tiny particles effectively target a broad spectrum of pathogens, including bacteria, fungi, and viruses. Their nano-scale size enhances penetration and adherence to the wound surface, providing superior protection and minimizing infection risk.

This technology fosters a cleaner wound environment and helps reduce inflammation, creating a more favorable condition for tissue repair. The result is a more effective barrier against infections and improved patient outcomes.

NanoCBD Technology

Complementing the antimicrobial action of NanoSilver, our NanoCBD technology offers targeted therapeutic benefits. NanoCBD uses advanced nano-encapsulation to deliver cannabidiol directly to the affected area, enhancing its bioavailability and therapeutic impact. This method ensures that CBD penetrates deeper into the skin layers, effectively reducing inflammation and alleviating pain. *Our CBD is isolate and 100% THC-FREE.*

In NanoGEL Plus, NanoCBD contributes to managing pain and discomfort associated with chronic wounds. The sustained release of CBD provides continuous therapeutic benefits, supporting natural recovery processes and improving patient comfort.

Benefits of NanoGEL Plus

- **Enhanced Antimicrobial Protection:** NanoSilver offers broad-spectrum defense against pathogens, reducing infection risks and maintaining a cleaner wound environment.

- **Effective Pain and Inflammation Relief:** NanoCBD delivers targeted relief from pain and inflammation, contributing to a more comfortable recovery experience.

- **Deep Penetration and Sustained Release:** Advanced nano-encapsulation ensures precise delivery of therapeutic agents, offering extended and effective support.

- **Affordable for Patients and Clinics:** NanoGEL Plus is competitively priced, wholesale at \$9.00 per bottle with an MSRP of \$25.00, providing a 150% return for clinics.

Clinical-Strength CBD Solutions for Pain Management

Physician's Own also offers clinical-strength CBD products designed for pain management in podiatric care. Our formulations use high-quality CBD/CBG isolate, ensuring our products are 100% THC-FREE while delivering maximum therapeutic benefits.

Our topical Pain Rub is ideal for localized pain relief, such as sports injuries, arthritis, or plantar fasciitis. Its deep-penetrating formula provides targeted relief directly where needed.

For comprehensive pain management, our oral CBD/CBG Sublingual Ultra Pain Drops offer a convenient and effective solution for systemic pain. These drops are designed for daily use, providing long-lasting relief and complementing other pain management strategies.

Commitment to Excellence and Patient Outcomes

At Physician's Own, our commitment to helping patients is central to our mission. We strive to improve patient outcomes through innovative, clinical-strength solutions addressing both pain management and wound care. Our goal is to provide compassionate, science-driven products that enable patients to reclaim their quality of life through natural and effective pain management.

Supporting Podiatric Professionals

We understand the importance of increasing revenue while maintaining high-quality patient care. By integrating our innovative, clinical-strength CBD solutions into your practice, you can enhance patient satisfaction and attract new patients seeking effective, non-narcotic pain management and wound care options.
