

Innovative Solutions in Neuropathy Treatment: The Neurogenx® Approach

By Colleen Harrower

In the realm of medical innovations, Neurogenx® is at the forefront with its pioneering approach to treating peripheral neuropathy, a condition affecting nearly 30% of Americans over 40 and increasingly prevalent among the aging US population. Neurogenx® offers a beacon of hope with its proven, non-invasive to minimally invasive, non-narcotic treatment, providing significant relief and improvement to patients who previously had limited treatment options.

electromedical devices. NervePro 2.0 comes with Auto Select Preset Programs P1 through P9 with improved functionality, delivering nearly double the congruent energy over four cycles per program instead of three. Sweeping 60,000 Hz to 400 Hz instead of 40,000 Hz to 400 Hz while dosing at a more gradual pace impacts even the most hypersensitive, difficult, and protracted cases. This higher frequency and biosimilar waveform mimic the body's electrical patterns, deeply stimulating cellular metabolism to enhance energy delivery and remove impediments

such as fluids and hydrogen. This promotes nerve fiber regrowth, improves motor and sensory function, and significantly reduces pain.

The Neurogenx® NerveCare Network is rapidly expanding, with hundreds of Neurogenx® Preferred Providers and certified Neurogenx® NerveCenters in the US and globally.

Revolutionary Treatment and Clinical Evidence

The Neurogenx® treatment uses the FDA-cleared Neurogenx® 4000Pro device employing advanced electromedical technology proven to alleviate neuropathy symptoms with 87% success rate. Supported by robust clinical evidence, independent tests have demonstrated substantial increases in nerve fiber density: 165.4% within 3-6 months, up to 2500% by 6-9 months, and 6600% by 9-12 months in epidermal nerve fiber density tests using punch biopsy samples—an established gold standard for assessing small fiber neuropathy. This treatment safely transmits electronic signals to reduce pain and promote cellular healing by enhancing metabolism, repairing cell membranes, balancing pH, removing excess fluids and waste, reducing swelling, and improving cellular function.

Neurogenx® NervePro 2.0: The Next Step in Neuropathy Care

The Neurogenx® NervePro 2.0 firmware represents a groundbreaking advancement in neuropathy treatment technology, building on the success of the Neurogenx® 4000Pro. It delivers electronic signals at higher therapeutic frequencies (60,000 Hz), significantly surpassing other

What Does Neurogenx® Treat?

The Neurogenx® technology is effective regardless of the origin of the neuropathy, safely treating neuropathic symptoms resulting from or associated with diabetes and various other conditions including Charcot Marie tooth disease, plantar fasciitis, phantom limb syndrome, fibromyalgia, complex regional pain syndrome, radiculopathy, neuritis, restless leg syndrome, tarsal tunnel syndrome, carpal tunnel syndrome, vascular conditions, viral infections, multiple sclerosis, HIV/AIDS, and chemotherapy. In addition to relieving neuropathic and chronic pain, it effectively aids recovery from post-operative pain, accidents, injuries including sports and back injuries.

Expanding Network of Care

The Neurogenx® NerveCare Network is rapidly expanding, with hundreds of Neurogenx® Preferred Providers and certified Neurogenx® NerveCenters in the US and globally. Neurogenx® NerveCenters are specialty medical centers dedicated predominately to neuropathy and other chronic nerve treatments exclusively with the Neurogenx® devices. The network is expected to double by the end of next year demonstrating the growing demand and recognition of this effective treatment.

Support and Training for Medical Providers

In the available options, Preferred Providers integrate the device into their existing practice, while NerveCenters operate as stand-alone facilities under Neurogenx® branding and procedures. Both receive training, marketing, and business support from Neurogenx® headquarters, ensuring effective operations and high-quality patient care. Our com-

Innovative Solutions *(continued)*

mitment to your success spans three key areas: (1) support and service, (2) performance and results, and (3) model training and continuous coaching. This includes ensuring consistent results for physicians, nurturing referrals, and enhancing digital marketing efforts.

Community Outreach and Education

Neurogenx® prioritizes community engagement through its Physician Liaison Program, fostering relationships with local physicians for referrals. This includes marketing and educational materials.

Patient Testimonials

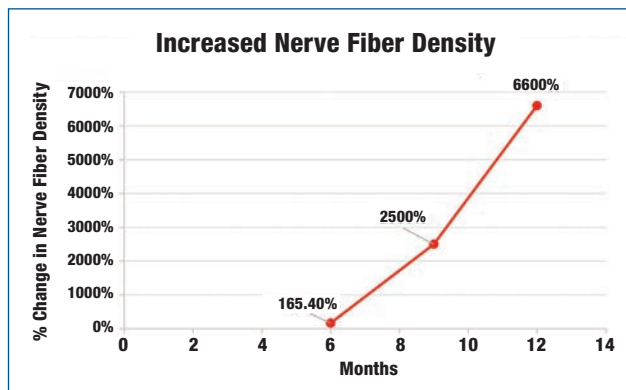

Patients who have undergone Neurogenx® Treatment report remarkable improvements in their quality of life. Dorothy V. shared, “I started walking without my walker after my fourth Neurogenx® treatment! I went to the mountains and walked along the town—and my balance is really good. I can walk from the garage up to the office and back to the garage with no problem. My scooter is now parked in the garage.” Similarly, Dale W. expressed, “For the first time in many years, I can climb a ladder with confidence unassisted. I feel like I have feet again. I can bend over, weed, and shower without fear of falling. I have increased stamina when accomplishing household tasks. I can feel my wife tickle my toes for the first time in our 49 years of marriage.” Richard K. added, “I had been wheelchair-bound since 2006. Within 1 week of treatment, I could get out of my wheelchair to my walker by myself, something I haven’t been able to do for years. I am also sleeping like there is no tomorrow. I can’t wait to see what the future treatments bring.”

M. Hatcher enthusiastically stated, “I have Happy Feet! Finally, after 16 years, I found a treatment that works. I have been coping with neuropathy due to chemotherapy. I had suffered with neuropathy for so long that I had accepted the discomfort as a way of life for me. But the Neurogenx® Treatment worked! The tingling and numbness are now gone.”

High Marks from Medical Practitioners

Podiatrists have observed significant improvements in their patients’ conditions with the Neurogenx® Treatment. Dr. Mitchell Wachtel,

DPM, noted, “At least 80 percent of my patients improved in some way shape or form. Even more surprising was that patients would actually come in routinely for the visits and not miss one of them.” One of Wachtel’s most gratifying cases involved a man who was overweight, diabetic, and required pain medication and two nerve medications to manage the severe pain from his neuropathy. After five weeks of treatments, he was able to go on long walks with his wife, sleep through the night, and had good balance. “It changed his life, and his wife thanked me personally for helping him”. Dr. Charles Solon, DPM, treats between 10 and 12 patients a week for different types of neuropathy and sees improvement in 80 to 85 percent of them. “I talk to a lot of people about NEUROGENX,” he said. “They can end up with a better life in general”.

Dr. Jane Graebner, DPM, shared, “It’s great to offer something besides medication. I have seen patients get off pain medication. We are using Neurogenx® to treat a wide variety of nerve condi-

tions. When I hear that my patients are returning to a more active lifestyle after treatments, it’s a pleasure!” Dr. Richard Jacoby, DPM, added, “It’s a fabulous technology, no doubt about it.” Most of the patients he has treated were either able to reduce or eliminate their neuropathy medication. Neurogenx® sells itself. It is word of mouth; those with neuropathy tell other people. Dr. Tom Silver, DPM, mentioned, “There was a patient who couldn’t sleep for more than two hours a night because of neuropathy who was able to sleep eight hours straight after treatment. Another was able to feel his shoes on his feet again. A man who suffered from constant electric-shock-type neuropathy in his feet and hands was able to reduce his daily medicine intake from 17 pills to about nine after treatment.” Dr. Michael Begley noted, “Improvement often becomes noticeable within 3-4 treatments.”

Conclusion

Neurogenx® is revolutionizing neuropathy treatment with advanced technology and an innovative approach backed by strong clinical evidence and a dedicated provider network. Through community outreach, education, and comprehensive medical support, Neurogenx® is raising the standard of care and transforming lives globally.
