

Nolaro24 Launches TriSteps™: A “First of its Kind” Line of Professional Over-the-Counter Orthotics

By Louis J. DeCaro, DPM and Roberta Nole, MA, PT, CPed

Nolaro24™, LLC, founded by Roberta Nole, CEO and Louis J. DeCaro, DPM, creators of the patented Quadrastep® System and littlesteps line of orthotics, proudly announces the launch of TriSteps™—a line of professionally-dispensed over-the-counter orthotics that offers podiatrists a faster, simpler solution for patients who need support beyond

in a ready-to-wear format. Each TriSteps™ model uniquely supports the foot in all three planes—making it much more than a basic arch support.

There are 3 models of TriSteps™ series, each designed to align with Nolaro24's evidence-based Quadrastep® foot typing method:

- **Model 1: The “A/C”**—Supports or restores a neutral arch for mild to moderate pes planus or pes cavus—blending features of the Quadrastep® A (Yellow) and C (Blue) devices.
- **Model 2: The “B/D”**—For moderate to severe splaying flatfoot, blending characteristics of Quadrastep® B (Purple) and D (Green).
- **Model 3: The “E/F”**—The first prefab orthotic on the market with extrinsic medial forefoot posting, targeting forefoot varus, and blending Quadrastep® E (Red) and F (Orange) elements.

“TriSteps™ aren't just another OTC arch support—they're real orthotics,” says Dr. DeCaro. “They're posted just like the Quadrastep® prefabs I already use in my practice and provide the same integrity and biomechanical support I expect from a high-end custom device. With TriSteps™, I can treat a wider range of patients quickly, afford-

retail inserts, but may not require full custom orthoses.

TriSteps™ fits into the full spectrum of orthotic care options offered by Nolaro24. Positioned between generic OTC insoles and higher-level Quadrastep® and custom devices, TriSteps™ gives clinicians a flexible, scalable option for treating the most difficult biomechanical cases—without sacrificing clinical integrity.

TriSteps™ are engineered to outperform typical drugstore insoles by delivering clinical-grade correction and comfort
